Glad to be a part of this event. Enjoyed so much the discussion about #DID and #web3 with the students from [The Hong Kong University of Science and Technology](#) 👍 :)

Want to know more about HashKey DID? 👁️ Create your own Web3 passport now >> hashkey.id 🗑️

HashKey Group is a proud partner of HKUST's flagship Web3 Carnival, organised by [HKUST Web 3.0 Labs](#) to commemorate the university's 30th anniversary.

Leo Li, Head of [HashQuark](#) (HashKey's staking-as-a-service provider) gave a keynote speech at the Carnival on November 8, where he introduced how proof-of-stake validation works, as well as how decentralised identifiers form an essential infrastructure of the Web3 ecosystem.

HashKey DID and the HKUST Crypto-FinTech Lab also jointly designed and minted a limited-edition On-Chain Soul Token (OST) NFT to recognise [The Hong Kong University of Science and Technology](#)'s commitment to empowering innovation and creativity.

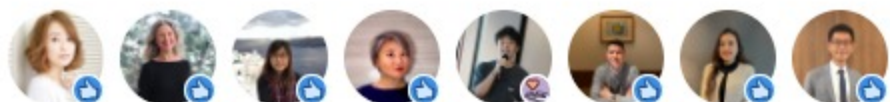

[Sophie Jim](#) from the HashQuark team also gave an in-person demo session for students on how they could create their own unique Web3 passport using the HashKey DID application. You can create your own Web3 digital identifier as well at www.hashkey.id !
