Frontend Chapter Lead
mayo de 2023 - Present (1 año 4 meses)
Lima, Perú

Frontend Web Software Engineer
marzo de 2022 - junio de 2023 (1 año 4 meses)
Lima, Perú

Currently I work as a specialist in development practices in the largest bank in Peru. As part of my responsibilities, I work on the implementation of policies and practices that improve code quality and reduce errors in software

development. Specifically, I focus on implementing code review policies and practices, developing and maintaining coding standards, implementing unit testing policies and practices, providing feedback and training to development teams, and staying up to date with the latest trends and technologies in the industry. software development field. All this in order to ensure that the development teams in the company work more effectively and efficiently, and produce high-quality software that meets the quality standards and requirements established by the company.

PedidosYa
Software Engineer Fullstack
enero de 2022 - marzo de 2022 (3 meses)
Lima, Perú

As a member of the core team, I have been responsible for designing and developing software using Golang for the Backend and React for the Frontend. I have worked on highly complex projects, including those with distributed architectures and microservices, and projects that require high performance and scalability. In addition, I have been responsible for implementing good development practices in the team, including the use of agile methodologies, unit tests, and build and deployment automation tools. Worked collaboratively with devops and infrastructure teams to ensure software integration and consistency. I have also researched and evaluated new technologies and tools to improve software performance, scalability, and security.

B89
1 año 9 meses

Backend Tech Lead
diciembre de 2020 - diciembre de 2021 (1 año 1 mes)
Lima, Perú

As a technical lead in a fintech using AWS, event-driven architecture, Web3 and Blockchain with Stellar, Hyperledger Besu and Ethereum, I led the definition and implementation of the platform architecture, implemented blockchain-based solutions, managed the technical team, researched and evaluated new technologies and collaborated with other teams to ensure consistency and integration of the platform. To achieve this, I used technologies like Kafka, Redis, Grafana, AWS Lambda, API Gateway, S3, RDS, and ECS.

Senior Backend Developer
abril de 2020 - noviembre de 2020 (8 meses)
Lima, Perú

As a Senior Backend Developer at a fintech startup, my responsibilities included designing and implementing the backend architecture, developing and maintaining GRPC-based services, using Blockchain with Web3, integrating the application with different payment service providers and verification service providers. identity, implement customer data platform using Segment, develop and integrate with relational databases, monitor applications and work with frontend teams. I also led a team of developers and participated in the definition of the application's architecture and in making technical decisions.

everis Perú
Solutions Specific Knowledge Analyst
noviembre de 2018 - marzo de 2020 (1 año 5 meses)
Provincia de Lima, Peru

As a Fullstack developer in the company's digital lab, I used Google Cloud Platform as cloud provider, React Native and Angular as Frontend, and NodeJS and Go as Backend to perform proof of concept on Digital Identity and Verifiable Certificates using blockchain. I led the definition and implementation of technical solutions for these projects, as well as the development and implementation of proofs of concept, guaranteeing their quality and compliance with technical requirements. In addition, I have been responsible for researching and evaluating new technologies, documenting and presenting the results of research projects with clarity and precision.

KayTrust
FullStack Developer
noviembre de 2018 - marzo de 2020 (1 año 5 meses)
Provincia de Lima, Peru

I worked as a web3 and blockchain developer. During my time there, I played a key role in designing and implementing blockchain solutions for the company's platform. We use Ethereum as the main platform, and I worked with technologies like Solidity, Truffle, Web3.js, and ganache to develop smart contracts and decentralized applications (dApps).

VASS LATAM
Frontend Architect
octubre de 2018 - octubre de 2018 (1 mes)
Provincia de Lima, Peru

As a Frontend Architect in projects for Movistar, I led the definition of the architecture, prepared the initial scaffolding, defined the taxonomy and the

Coding Standard in Angular to guarantee scalability, performance and code quality. I also created tools to automate the creation of new components and modules and to apply the Coding Standard and perform static code analysis.

Novit Perú
Full Stack Developer
febrero de 2016 - septiembre de 2018 (2 años 8 meses)
Miraflores, Lima - Perú

As a Fullstack developer at Outsourcing NOVIT, I have worked on projects for renowned clients in various sectors, including health, insurance, retail and television, such as Mapfre, Latina TV, Intercorp, SGS Peru, Clínica San Pablo and BNP Paribas Cardif. I have developed both the Frontend and the Backend, using Angular, Javascript and Ajax for the development of the user interface and C# for the development of business logic and database management. I have also worked on integration with cloud services such as Google Cloud Platform and Azure, and on maintaining and improving existing software, troubleshooting technical issues, and collaborating with other developers on the team.

Sw Factory
Programmer Analyst
enero de 2013 - enero de 2016 (3 años 1 mes)
Chorrillos, Lima - Peru

As a Programmer Analyst in different sectors, I have developed web applications using HTML5, CSS3, Javascript and ASP for the frontend and C# for the backend, working with databases such as Oracle and SQL Server. I have participated in projects for renowned clients such as Mapfre, Clínica Ricardo Palma, Clínica TEZZA and Industrias NETTALCO, performing requirements analysis, design, programming and testing. I have also defined and followed coding standards and good practices to ensure the quality and maintainability of the software developed. My experience in this company has allowed me to acquire skills in web development, teamwork and meeting deadlines, guaranteeing the quality and efficiency of the software to satisfy the client and ensure the success of the project.

Fabrica de Software INTI S.A.C
Programmer Analyst
julio de 2012 - diciembre de 2012 (6 meses)
San Isidro, Lima

As a specialist in the development of HTML5 and CSS3 web templates, I have designed and developed attractive and functional web templates for different platforms and web systems, ensuring compatibility with multiple browsers and devices. I have also worked collaboratively with backend developers to integrate the templates into existing web systems and maintain and update existing templates applying web development best practices. In addition, I have collaborated with graphic designers to ensure the visual consistency and aesthetics of the templates. Additionally, I have worked developing and maintaining web systems using programming languages such as PHP and Node.js, which has included developing new features, resolving bugs, and maintaining system security.

SOFTBRILLIANCE
Frontend Developer
septiembre de 2011 - junio de 2012 (10 meses)
San Luis, Lima - Perú

As a Frontend Developer, my job was to design and develop web templates using HTML5, CSS3 and Javascript for different web applications for surgeons in the United States. Also, I was in charge of the maintenance of existing web pages and content managers using PHP and MySQL. I worked together with the backend team to ensure the correct integration of the developed web templates and carried out quality tests to ensure that the web applications work optimally in different browsers and mobile devices. Participated in project follow-up meetings and collaborated with the team to meet established deadlines and objectives. My experience allowed me to acquire skills in web template design and development, teamwork, and troubleshooting on large-scale web projects.

Webstardata
Frontend Developer & Designer
enero de 2011 - agosto de 2011 (8 meses)
Chorrillos, Lima - Perú

As a Frontend Developer, I have had experience in the elaboration of Web Templates with HTML5, CSS3 and Javascript for different web applications and in the creation of graphic pieces and advertising via mailing. I have also designed websites and web applications, ensuring an optimal user experience and a visually appealing interface. In addition, I have worked on the optimization of websites and web applications to improve performance and loading speed, and I have solved problems and errors related to the Frontend. I have worked on projects in different areas and I have developed skills in

handling tools and technologies such as Photoshop, Illustrator, Git, React and Angular JS.

INSTITUTO SIDEM - SAN IGNACIO DE MONTERRICO
Frontend Developer & Designer
enero de 2008 - diciembre de 2010 (3 años)
Villa Maria del Triunfo, Lima - Perú

During my first job as a Frontend Developer and Designer in the education sector, I designed and developed web pages for the Montessori College of Villa, the San Ignacio de Monterrico Institute and the Peruvian University of Global Integration, all belonging to the SIDEM consortium. My responsibilities included the development of mockups and graphic pieces for web pages with an attractive and friendly design for the end user, the development of web pages using HTML5, CSS3 and Javascript to ensure a clean and efficient code, the integration of web pages with a backend developed in PHP and MySQL for the management of content and user data, and the maintenance and updating of web pages to guarantee their proper functioning and security. In addition, I was also in charge of the elaboration and sending of publicity via mailing for the promotion of the clients' services.
