# Vikram Anand Bhushan

Co-Founder at Hypermine  
Dubai, United Arab Emirates

## Summary

With over 9 years of experience as a full-stack developer and co-founder, I have a passion for building innovative and scalable solutions using blockchain and artificial intelligence technologies. I co-founded Hypermine, an emerging technology company that is dedicated to creating blockchain applications, cryptographic security products, and consulting services for consumers, enterprises, and governments. I believe in the power of blockchain and AI to transform the world for the better, and I strive to deliver value, quality, and impact to our clients and users.

At Hypermine, I am involved in every aspect of the co-founding process, from project planning and cost estimation, to finding the right people to work with, to leading the complete development process. I take care of all the mobile and web related code as a developer, and I have scaled Fyre to 150,000 users and 5K MRR. I have extensive experience with Node.js, PHP, Laravel, Vue.js, AWS, WebSockets, NoSQL, and other technologies that enable us to build fast, secure, and reliable applications. I also have some DevOps experience, such as implementing complete infrastructure on AWS and decoding a monolithic application into microservice architecture. I enjoy working with a team of seven talented developers, and I support them technically and professionally.

---

## Experience

Hypermine | Creators of HypersignID  
Co-Founder  
March 2019 - Present (5 years 7 months)  
Bengaluru Area, India

My role is to do everything a co-founder needs to do. I am involved in following task.

2024

I have embarked on a slightly different role, I spearheaded the web3 product research and Growth Marketing.

- I brought back activity on our token \$HID
- I helped team do strategic research in understanding web3 pain points and we launched 2 new products
- I helped get our Testnet huge amount of visibility in terms of Retail Investors

=====

2022

- Project Planning and cost estimation
- Finding the right people to work with.
- Leading the complete development process
- I take care of all the Mobile/Web related code as a developer.
- Scaled Fyre to 150,000 users and & 5k MRR

About Us

We are an emerging technology company that is dedicated to building trust and transparency in the real world. Using Blockchain as our core technology coupled with Artificial Intelligence, we are building a range of blockchain applications, cryptographic security products and offer consulting for consumers, enterprises and governments looking to get on the blockchain.
