Ben Taylor

Delivering decentralized software solutions to transform healthcare
Las Vegas, Nevada, United States

Summary

LedgerDomain makes DSCSA compliance easy with decentralized identity and secure applications for the pharmaceutical supply chain. With DSCSA product tracing, enhanced verification, secure portals, and more, we're helping our customers deliver the right medications to the patients who need them, and the right information to their fellow professionals.

Our healthcare platform is powered by the world's first enterprise-grade decentralized app server and decentralized identities – enabling a single source of truth on a drug's location at the refrigerator level, easy setup of secure biometric credentials, easy integrations with legacy systems, and rapid compliance with DSCSA, GDPR, and CCPA regulations.

Experience

LedgerDomain

CEO

May 2016 - Present (8 years 4 months)

Las Vegas, Nevada

LedgerDomain makes DSCSA compliance easy with decentralized identity and secure applications for the pharmaceutical supply chain. With DSCSA product tracing, enhanced verification, secure portals, and more, we help deliver the right medications to the patients who need them.

Clinical Supply Blockchain Working Group

Member

November 2017 - Present (6 years 10 months)

Part of a consortium of pharmaceutical industry leaders building the blockchain-powered clinical supply framework for the 2020s.
