Summary

Social entrepreneur

Experience

Sustain Bite

Founder

August 2023 - Present (10 months)

Silicon Valley, California, United States

NGO Irma

Founder CastrTomsK \ Deputy Director Of Public Relations

January 2022 - May 2024 (2 years 5 months)

Томск, Томская область, Россия

<https://castrtomsK.taplink.ws/>

I am proud to have created a social project, CastrtomsK, to mitigate the
population of stray dogs in Tomsk. Our project merged with NGO Irma, as we
are both committed to addressing this critical issue.

To support our efforts, I wrote an economic proof for our mitigation
strategies, which can be found here: <https://docs.google.com/document/d/10EGiApA2ryPMnjwBbnEgvBbDewFuzFyrUQwjgNzS2oM/edit>.

Our project has successfully helped castrate over 500+ animals, and the
number continues to grow each week. I am committed to making a positive
impact in my community and am excited to see our project's continued
success.

Tonomy Foundation

Co-Founder, COO

April 2022 - July 2023 (1 year 4 months)

Амстердам, Северная Голландия, Голландия

Thrived in a fast-paced environment as COO, effectively managing multiple tasks and projects simultaneously, ensuring seamless operations and organizational success.

Starost v radost, NGO

Volunteer Staff

May 2021 - March 2022 (11 months)

Томск, Томская область, Россия

As a compassionate and dedicated individual, I am committed to helping elderly people in difficult life situations. In my role, I take on a range of tasks, from delivery to fixing things.

Some of my accomplishments include:

- Finishing an open-air cage for eight dogs with dog houses
- Helping to construct a water line for a 76-year-old lonely woman. I gathered the necessary official documents and supervised the job, negotiating a 20% discount on the price

I am proud of the work I have done to support and improve the lives of elderly individuals, and I am always looking for new ways to make a positive impact.

Directional Drilling Services

Chief Executive Officer

September 2019 - June 2020 (10 months)

Москва, Россия

Some of my key accomplishments include:

Increasing the number of oil rigs from 1 to 8, which resulted in a 500% increase in revenue

Hiring and training approximately 40 employees, including the creation of screening and onboarding processes

Negotiating and signing a contract worth £130k in Kazakhstan, and successfully completing drilling operations in the region

Initiating and completing the improvement of our equipment in partnership with NOV (National Oil Varco) company in the USA

I am excited to continue making a positive impact in any industry.

Halliburton

Senior LWD engineer

October 2008 - August 2018 (9 years 11 months)

UAE, Abudhabi

As an experienced professional in the oil and gas industry, I have a track record of achieving successful results. Some of my accomplishments include:

Creating an equipment catalogue with photos, which was distributed worldwide. This catalogue allowed our customers to easily identify and order equipment from among the 1500 different units we offer, saving time and improving efficiency.

Educating and assessing more than 20 lead engineers in 9 countries. I worked closely with these individuals to ensure that they had the knowledge and skills they needed to succeed in their roles.

Proving to a customer that 12 hours of non-productive time, equivalent to £100k, was not related to our equipment. This required careful analysis and attention to detail, and I was able to effectively communicate my findings to the customer.

Writing instructions on how to install offshore equipment on semi-sub rigs for our Russian branch. These instructions were clear and easy to follow, and allowed even those who had never worked with this equipment to run a job successfully.

ЗАО "Сервисный центр бурения"

MWD-Engineer

July 2007 - October 2008 (1 year 4 months)

As a drilling supervisor, I successfully trained two engineers and made a crucial decision to halt drilling based on Gamma Ray data indicating that adjacent wells were not correlated. By doing so, I prevented a costly sidetrack and saved the customer over £200k. This decision demonstrates my dedication to ensuring efficient and effective operations

Education

Heriot-Watt University

Master of Engineering - MEng, Petroleum Engineering · (2018 - 2019)

Томский Политехнический Университет / Tomsk Polytechnic
University

Master of Physics, Nanopowders · (2003 - 2009)
